EzyPay’s Merchant solution enables users to integrate their own shopping cart system to have credit card processing abilities. Communication with EzyPay secure transaction servers is accomplished through a standard POST or GET within an HTML form or an URL.

**Integration method**

Variable / Parameter passing method: GET or POST to <https://www.ezypay.com.my/payment/ezypay.php>

| Field Name    | Description  | Example   |
|---------------|--|---|
| business *    | Your username to login   | <a href="mailto:demo@ezypay.com.my">demo@ezypay.com.my</a>        |
| amount *      | Amount your want to charge in RM   | 10  |
| currency_code | Currency you need to use for this time being it’s RM   | RM  |
| item_name     | Item Name, will be something for your product description  | My Books  |
| return_url    | Which URL you want to redirect after payment successful. Default will be redirect to <a href="https://www.ezypay.com.my">https://www.ezypay.com.my</a> | <a href="http://demo.ezypay.com.my">http://demo.ezypay.com.my</a> |

\* required fields

*Example URL (GET Method)*

[https://www.ezypay.com.my/payment/ezypay.php?business=demo@ezypay.com.my&amount=40.30&currency\\_code=RM&item\\_name=My+Books&return\\_url=http://demo.ezypay.com.my](https://www.ezypay.com.my/payment/ezypay.php?business=demo@ezypay.com.my&amount=40.30&currency_code=RM&item_name=My+Books&return_url=http://demo.ezypay.com.my)

*Example HTML Form (POST Method)*

```
<form name="ezypay" method="post" action="https://www.ezypay.com.my/payment/ezypay.php">
  <div align="center">
    <input name="return_url" type="hidden" id="return_url" value="http://demo.ezypay.com.my">
    <input name="item_name" type="hidden" id="item_name" value="My Books">
    <input name="currency_code" type="hidden" id="currency_code" value="RM">
    <input name="amount" type="hidden" id="amount" value="10">
    <input name="business" type="hidden" id="business" value="demo@ezypay.com.my">
    <input type="submit" name="Submit" value="Buy Now">
  </div>
</form>
```

What you'll get when you submit using GET / POST method is EzyPay Page that will process the transaction

\* NetBuilder EC will be stated on your client credit card statement

## Ezypay System Integration

The following are some of the fields that will be passed back to *return\_url*

| Field Name | Description  | Example  |
|------------|--|--|
| err_code   | Error code is code that return, currently is '00' and '11' | 00 = successful transaction<br>01 = failed transaction |
| err_desc   | Description  | Failed or Approved                                     |
| amount     | Amount process in RM                                       | 10   |
| transdate  | Transaction date YYYY-MM-DD<br>HH:mm:ss                    | 2006-02-01 12:30:21                                    |
| item_name  | Item name that you send from item_name                     | My Books   |

Example return\_url

[http://demo.ezypay.com.my?err\\_code=00&err\\_desc=approved&amount=10&transdate2006-02-01+12:30:21&item\\_name=My+Books](http://demo.ezypay.com.my?err_code=00&err_desc=approved&amount=10&transdate2006-02-01+12:30:21&item_name=My+Books)

You can login to your account for information on transaction that successful or failed.

The screenshot displays the EzyPay user interface. At the top left is the EzyPay logo. On the top right, it says "Demos EzyPay [ Sign Out ]". Below the logo is a navigation menu with four main tabs: "Welcome", "My Account", "Profile", and "Help". Under "My Account", there are sub-tabs: "Overview", "Add Funds", "Withdraw", and "Credit Card Terminal". Below the navigation is a breadcrumb trail: "Main » My Account » Overview".

The "User Details" section shows:

|       |                                      |
|-------|--------------------------------------|
| Name  | Demo EzyPay Merchants (Demos EzyPay) |
| Email | demo@ezypay.com.my                   |

The balance is displayed as **RM 717.70**.

The "Transaction List" section contains a table with the following data:

| Transaction ID | Transaction Date | Type        | Status   | Amount    | Fee       | Details     |
|----------------|------------------|-------------|----------|-----------|-----------|-------------|
| 1137567227     | 18 Jan 2006      | Credit Card | Approved | RM 150.30 | - RM 6.76 | [ Details ] |
| 1137402683     | 16 Jan 2006      | Credit Card | Approved | RM 150.30 | - RM 6.76 | [ Details ] |
| 1137298088     | 14 Jan 2006      | Credit Card | Approved | RM 150.30 | - RM 6.76 | [ Details ] |
| 1134010731     | 07 Dec 2005      | Credit Card | Approved | RM 150.30 | - RM 6.76 | [ Details ] |
| 1134007789     | 07 Dec 2005      | Credit Card | Approved | RM 150.30 | - RM 6.76 | [ Details ] |

At the bottom of the transaction list, there are navigation icons: a double left arrow, a single left arrow, the number "1", a single right arrow, and a double right arrow.

At the very bottom of the page, it says "Copyright © 2006 EzyPay. All rights reserved."

## Withdrawal

You must set bank account information for us to process your withdrawal (Profile > Bank Account)

You must withdraw your account manually using the withdraw facility (My Account > Withdraw). Credit card transaction can only be withdraw after 23 days of transaction. Please wait until 5-7 days business days for your fund available on your account.

Each withdrawal will be charge RM 2. If your information is incorrect , your withdrawal will be returned excluding your fee.
